

Allison A10L1000 Series Products From **RatioTek**[™]

10 Speed Allison transmission calibration kits.

From stock rebuilds to Monster trucks!!

RT-A10L-PR and **RT-A10L-PRX** are the only products you need to handle big power and extended durability!

Valve Body Kit Features:

Controls torque capacity with different spring selections to achieve desired results.

Patented pressure relief and boost system.

Easy to Install without removing transmission- Great Results

RT- A10L-PR[™]

Fits 2020 and later 10 Speed Allison
GMC and Chevrolet **Diesel** Trucks

For the every day truck. Kit sets minimum pressure and boosted pressure to levels that are a match for stock power levels and boosted power 120hp over stock.

Good News - Customers will say the engine runs better after installing this kit. This is because De-fueling under torque management will be eliminated. The trans will have enough holding power to allow full fuel delivery.

"Rebuilding this trans with out using this kit is serious mistake." **Steve Younger**

RT- A10L-PRX[™]

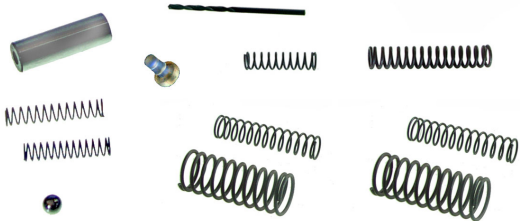

Fits 2020 and later

Kit sets minimum pressure and boosted pressure to levels that are a match from 800HP to or more adjustable within the kit.

This kit is for racing, tractor pulls and chipped out monster trucks.

Extreme!!

Kits install without removing trans

A better way of shifting gears.™
